Front Management

Fully Loaded - 144F

Overview

The SpliceGroup™ 12-Way Customer Termination Panel (CTP) is a compact, modular 1U front-access panel designed for high-density fibre management. It supports up to twelve SpliceGroup™ Compact Modules (CTM), providing a capacity of up to 144 fibres with small-form-factor connectors.

The fibre count can be increased to 432 fibres using very small form factor (VSFF) connectors. Front-loading modules enable quick configuration changes without disturbing existing fibres.

The split-chassis design allows independent module handling, and optional rear cable-management accessories are available.

Includes a front fibre management kit for organised fibre routing and a port mapping label for easy identification.

Main Features

- Compatible with 19", 21", 23" racks and ETSI mounts
- Simple installation and universal rack fit
- Independent module management
- Front fibre management; optional rear cable management
- Supports 12 x modules per 1U (up to 144 fibres)
- Scalable design with mix-and-match modules
- Suitable for passive optical devices (CWDM, DWDM, Splitters)
- Compatible with various connector types (SM, OM1 - OM5).
