

8 Port MTP®/MPO

12 Port LCAPC

Slimline Patching Module Options

Overview

The **Slimline Patching Module** is a highly versatile, plug-and-play solution for patching, connecting, and managing fibre-optic infrastructure.

Available in a range of fibre types, it can be tailored to suit a wide variety of applications. Supplied with factory-fitted adapters, the module arrives fully prepared for rapid deployment.

Designed for seamless integration with the SpliceGroup™ 6-Way Customer Termination Panel, its tool-less design allows modules to be inserted individually, without disturbing pre-installed units.

Its compact layout maintains bend-radius control at every stage, while fibre retainers and ties support clean, well-organised fibre routing.

Accommodating up to twelve ports the module maximises port density without compromising accessibility—ensuring moves, adds, and changes (MACs) remain simple, safe and efficient.
